

## These Beltone Touch features help you hear better in almost any environment:

**Sound Cleaner Noise Reduction Management:** Reduces background noise to help you hear more comfortably

**Wind Noise Suppression:** Suppresses noise caused by wind, so you can enjoy outdoor activities

**Smart Gain:** Automatically switches between seven different settings, depending on the type of environment you're in, to give you the right amount of amplification

**Silencer System:** Suppresses irrelevant background noise when you are in a quiet environment

**Low Battery Warning:** Warns you when it's time to change batteries

**Satisfy:** Slowly adjusts the level of amplification so you to get used to the optimal level

**Multichannel MPO:** Ensures that sudden loud sounds are only amplified to a comfortable level

## How do you make one of the world's smallest hearing instruments even smaller?

The secret of the Beltone Touch is an exciting new design. This industry first design results in a virtually invisible hearing instrument. It not only provides you with the latest digital circuit features for helping you hear better, but also takes advantage of the anatomy of your ear to provide more natural sound quality and amplification.

TOUCH™

### **Designed for discretion**

Beltone Touch is 36% smaller than our next-smallest hearing instrument. It's truly invisible on most people and scarcely perceptible on many more. And it's designed to fit inside your ear. Just about all anyone will ever (just barely) see is the thin transparent tube inside your ear. It holds Beltone Touch comfortably and securely in place. So unlike some other hearing aids, things like hairbrushes, glasses or even vigorous physical activity won't knock it off.

### **Comfortable to Wear**

There's a Beltone Touch Instant model with smooth rounded edges that fits comfortably in most ears. Or you can choose a Beltone Touch model that's custom made just for you. Either way, Beltone Touch provides you with a level of comfort that lets you go about your business as usual. Plus, when you wear a Beltone Touch open-fit instrument, there's no "clogged-up" feeling or uncomfortable sounds – for example, when you chew. And your own voice sounds natural.

### **Thinks like an Ear**

The world's best hearing system is the healthy human ear. With Beltone Touch, we've done our best to make the most of the ear's characteristics. Because Beltone Touch sits entirely inside your ear, it makes the most of your ear's own sound paths. That means even when there's background noise, you'll have an easier time understanding speech.
