

*Beltone*  
**reach**<sup>™</sup>  
flexible intelligence

These Beltone Reach features help you hear better, no matter where you are:

- **Smart Beam Steering with Automatic Beam Widths:** Exclusive Beltone Reach feature that automatically zooms in on speech sounds when background noise is present and zooms out when noise is no longer present
- **Monitored Directionality:** Helps you hear sounds that you want to focus on and monitor other sounds around you
- **Speech Spotter with Automatic Directionality Switching:** Helps you focus on conversation in front of you
- **Sound Cleaner Noise Reduction Management:** Absorbs background noise to help you hear more comfortably
- **Wind Noise Suppression:** Suppresses noise caused by wind, so you can enjoy outdoor activities
- **Smart Gain:** Automatically switches between seven different settings, depending on the type of environment you're in, to give you the right amount of amplification
- **Learning Volume Control:** Automatically increases or decreases volume, based on your past preferences

Belton Reach's automatic features make it one of the most advanced and user-friendly hearing instruments on the market today. No matter what type of environment you're in, Reach has features that can help you hear comfortably and clearly.

#### Words come alive

Belton Reach automatically zooms in and out to focus on sounds in front of you and next to you. At the same time, it dampens sounds around you that might otherwise distract you in your conversation. With Reach, you can communicate with family, friends or business associates, even in noisy surroundings.

#### Make the most of your natural listening abilities

With Monitored Directionality™, Reach focuses one ear on speech, while the other monitors the sounds around you. It's designed to mimic your brain's natural ability to determine what sounds you should focus on.

Reach's Monitored Directionality™

#### Adapts to the Way You Live

Belton Reach automatically adjusts amplification to your needs. It detects and suppresses wind noise to make sure you can comfortably enjoy your outdoor activities. It even learns your volume preferences and automatically adjusts the sound level for you.

Reach can be fine-tuned to match your exact hearing needs in up to seven of the sound environments you most often encounter. Your hearing instruments then automatically detect which environment you're in and change settings accordingly. With all the automatic features in Belton Reach, you don't have to think about your hearing instruments. You're free to live your life the way you want to.

#### Small. Elegant. Discreet.

Belton Reach is available in all of our most popular styles. You'll find the natural, discreet look of Belton Reach surprisingly small and attractive. All models in this series have been designed to make you look and feel confident.
